## Education

Program	Institution/Board	CGPA	Year
B.Tech (Computer Science & Engg.)	Walchand College of Engineering, Sangli	8.46/10	2021-2025

## Work Experience

**Purple.com** (Backend Developer Intern) Jan - Feb 2024 Mumbai

- Worked on Nest Js APIs, overseeing backend orchestration and optimising response times.
- Enhanced User response time by implementing efficient Caching mechanism.
- Contributed to optimise database queries for efficient search and retrieval.

## Achievements/Awards

- **ICPC 2022-2023** - AIR Rank 736 in Preliminary Round ICPC Mathura-Kanpur
- **NeuroHack MS23** - Winner
- **Flipkart Grid 5.0** - Qualified in top 200 teams
- **Code for freedom by Coding Ninjas** - AIR 219
- **Confluence 2k23 by Softa WCE** - Winner
- **CodeChef Starters 67 Division 2 (Rated)** - Global Rank 118
- **ACM 7th Research Symposium** - Winner
- **Hackerrank** - Gold Badge C++ & Silver Badge SQL
- **CodeChef** - Highest Rating - 1720 [3☆] ([thundersmoker](#))
- **Google Cloud Bootcamp Certification** - Geeks for Geeks
- **Backend Certification** - FreeCodeCamp
- **API Fundamentals Expert** - Postman
- **Certificates** - [LINK](#)

Solved 700+ coding problems over various online platforms

## Key Projects

### 1. FlipGem - Blockchain based Loyalty reward system

(React JS, Web3.js, Chart.js, Nodejs, Hardhat, Solidity, BlockChain, Polygon)

🔊 [GitHub](#) | 🔗 [Link](#)

- Utilized Ethereum blockchain to establish E-commerce loyalty rewards, fostering user engagement.
- Executed Solidity smart contracts for custom ERC-20 token creation, enhancing platform incentives.
- Integrated Hardhat for seamless blockchain connectivity, ensuring a smooth user experience.

### 2. TagHUB - CRUD platform to share your thoughts with tags

(NextJS, MongoDB, Firebase)

🔊 [GitHub](#) | 🔗 [Link](#)

- A web platform for global thought sharing with user-generated tags for precise search.
- Enabled Credential and Google Authentication through NextAuth.js, including profile picture choice.
- Utilized MongoDB to store user-generated thoughts and information, enriching the interactive journey.

### 3. MicroCommerce- Microservice backend for E-commerce Application

(SpringBoot/Hibernate, Kafka, MongoDB, Postgres, KeyCloak, Grafana, Prometheus, Docker)

🔊 [GitHub](#) | 🔗 [Link](#)

- An E-Commerce API backend for seamless inventory checks and order processing.
- Established event-driven Notification Service via Kafka broker to ensure timely updates.
- Containerized microservices using Docker, achieving local scaling on Kubernetes for enhanced efficiency.

## CourseWork

- Data Structures and Algorithms
- Operating System
- Database Engineering
- Computer Networks
- Artificial Intelligence

## Technical Skills

- **Programming Language** : C++, python, Java
- **Technology** : Node, Express, React, NEXT, SpringBoot, Blockchain
- **Database** : MySQL, MongoDB, Firebase
- **Cloud & DevOps** : Git, Docker, Linux, GCP, Grafana, Prometheus

## Positions of Responsibility

- Cloud Executive Google Developer Students Club WCE
  - Led a DevOps workshop series for the cloud team, fostering skill development and exposure to Cloud Technology.
  - Organized and managed 5+ community events on trending and important topics like Git, Flutter, etc.

## Interests

- Research
- Robotics
- System Design
- Deep learning
- Neural Networks
